# Carving

600x1200MM

The Project  
Overrides  
**The Boundaries**  
Between  
**Architecture**  
**And Landscape**

For architecture and design,  
carving represent a conceptual resource  
and aesthetic, an instrument to achieve  
not only great effects  
scenographic but also minimalist spaces,  
with a versatility of  
composition and material.

# Research & Development

REY believes in the advancement for better living. Technology has booned us with various innovations, that grant us a better chance to innovate. In earlier times, there was no scope of making scratch proof or slip resistant tiles. But with the new technical machineries, it is possible to manufacture vitrified tiles which have several other benefits as well. Another major factor to help us bring about the latest products and designs in the Ceramic industry is, our research department. At REY, we perform R&D for, each and every product we manufacture beforehand. This helps us understand the best practices required for manufacturing and other significant dynamics.

Hygienic Surface

Stain Resistant

Frost Resistant

Feel The Crave For

*Carving*

# Every tiles is **Masterpiece**

For architecture and design, carving are an excellent planning and style resource, ideal for creating grand, striking effects; they're equally suitable for smaller spaces, offering versatility in terms of composition and material.

Clay features the coated effect typical of carving, with a slightly shiny effect on a matt surface, in a palette of dense colours, both warm and cool, ranging from white through three different shades of grey, from greige to taupe, and three colours with a contemporary soul: cotto, mustard and petrol blue, suitable for bringing a touch of character to any setting.
